EDUCATION

University of California, Berkeley	Expected Graduation May 2029
<i>Bachelor of Arts in Data Science, Bachelor of Arts in Economics</i>	<i>Berkeley, CA</i>
Relevant Coursework: Principles & Techniques of Data Science, Data Structures, Concepts of Probability, The Structure & Interpretation of Computer Programs, Microeconomics (Quantitative), Macroeconomics (Quantitative)	
The Chinese University of Hong Kong	June 2026 – July 2026
<i>UCEAP Summer Study Abroad</i>	<i>Hong Kong SAR, China</i>

PROFESSIONAL EXPERIENCE

UC Berkeley College of Environmental Design (CED) Communications Team	Aug. 2026 – Present
<i>Photographer, Videographer, & Graphics Assistant</i>	<i>Berkeley, CA</i>
- Photograph & film events, lectures, & studio work for CED, delivering edited assets for web, social media, & flyers - Develop & maintain CED's brand & style guide, establishing consistent visual identity across materials - Create graphics & design assets for CED communications, ensuring alignment with brand & accessibility guidelines	
UC Berkeley Department of Electrical Engineering & Computer Sciences (EECS)	Aug. 2025 – Present
<i>Student Assistant</i>	<i>Berkeley, CA</i>
- Operate & maintain robotics, electrical, & AV equipment run by UC Berkeley's Electronic Support Group (ESG) - Support hardware labs with soldering, troubleshooting, & microcontroller projects (Raspberry Pi, TI Launchpads) - Assist with equipment setup, inventory, & office + lab environment organization using equipment (e.g. TriCaster)	
Global Inheritance	Feb. 2026 – May 2026
<i>Website & Brand UI/UX Contract Designer</i>	<i>Berkeley, CA</i>
- Redesigned the full website known for Coachella activations, delivering 10+ high-fidelity pages in Figma - Ran competitive audits of 4 nonprofit & event platforms + a heuristic site audit & volunteer surveys, identifying unclear messaging, buried CTAs, & redundant navigation as the core barriers to sign up for volunteering - Developed a refreshed brand system with updated color palette, type scale, & reusable Figma components	
Mozilla Incorporation, Firefox Team	Oct 2025 – Feb. 2026
<i>Software Extension Contract Designer & Back-End Engineer</i>	<i>Berkeley, CA</i>
- Designed a Firefox extension that shows CPU & memory savings & proactively suggests which tabs to sleep or close - Ran competitive & internal audits, an 88-response survey, & 15 interviews to define product requirements - Benchmarked browser performance across 5 machines & 4 benchmarks (470+ datapoints) to build hardware-tiered suspension logic (low-end machines ran DOM-heavy operations 9-21x slower), shaping optimization strategies	

PROJECTS

Aurora Feature Identification from All-Sky Imagers in Antarctica	Sep. 2026 – Present
- Built visualization tools for Antarctic all-sky imager data at UC Berkeley's Space Sciences Lab, processing 30 years of aurora imagery (7.3 kB frames captured every 20 seconds) across multiple observatory stations - Reproduced auroral pattern classification using 2D Fast-Fourier Transform & evaluated deep learning architectures for automated feature identification in support of NASA's CINEMA mission	
Healthcare Fraud Detection	Feb. 2026 – May 2026
- Built an end-to-end fraud detection pipeline on public Medicare inpatient claims data in Python (pandas, statsmodels), engineering length-of-stay, diagnosis/procedure code counts, & top K diagnosis group features - Fit OLS regression models of claim reimbursement & used 95% prediction intervals to flag claims billed above expected cost, aggregating flags into provider-level risk metrics (flag rate, total & maximum excess dollars)	

TECHNICAL SKILLS & LANGUAGES

- Skills: Python (Pandas, Polars, NumPy, Seaborn, Statmodels), Java, SQL, HTML/CSS, JavaScript, React, Figma, Adobe Photoshop/Lightroom
- Languages: English (Native), Chinese Cantonese (Native), Chinese Mandarin (Native)
