UX/UI Designer

A silhouette of a commercial airplane is shown in flight against a vibrant orange and yellow sunset sky. The plane is positioned in the lower-left quadrant of the image, flying towards the right. The sky is filled with soft, wispy clouds, and a bright, horizontal line of light suggests the sun is just below the horizon.

Project Goals

Problem Statement

How might we create a seamless mobile app experience that visually and physically comforts the user in a way that encourages stress-free travel on the go.

User Group Problem Statement

Avid travelers struggle with feeling at ease when planning itineraries and vacations, which leads to stressful experiences when traveling

Competitive Analysis

Features

- Interactive map
- Daily itinerates
- Expense tracker
- Comprehensive guide
- Book everything (flights, hotel, tickets, etc) on one app
- AI chatbox feature

User Experience

- Long scroll time or too many info could get user overwhelmed
- Keep a clean, minimal look
- Have a strong nav bar so users know where to go
- Keep a strong visual hierarchy

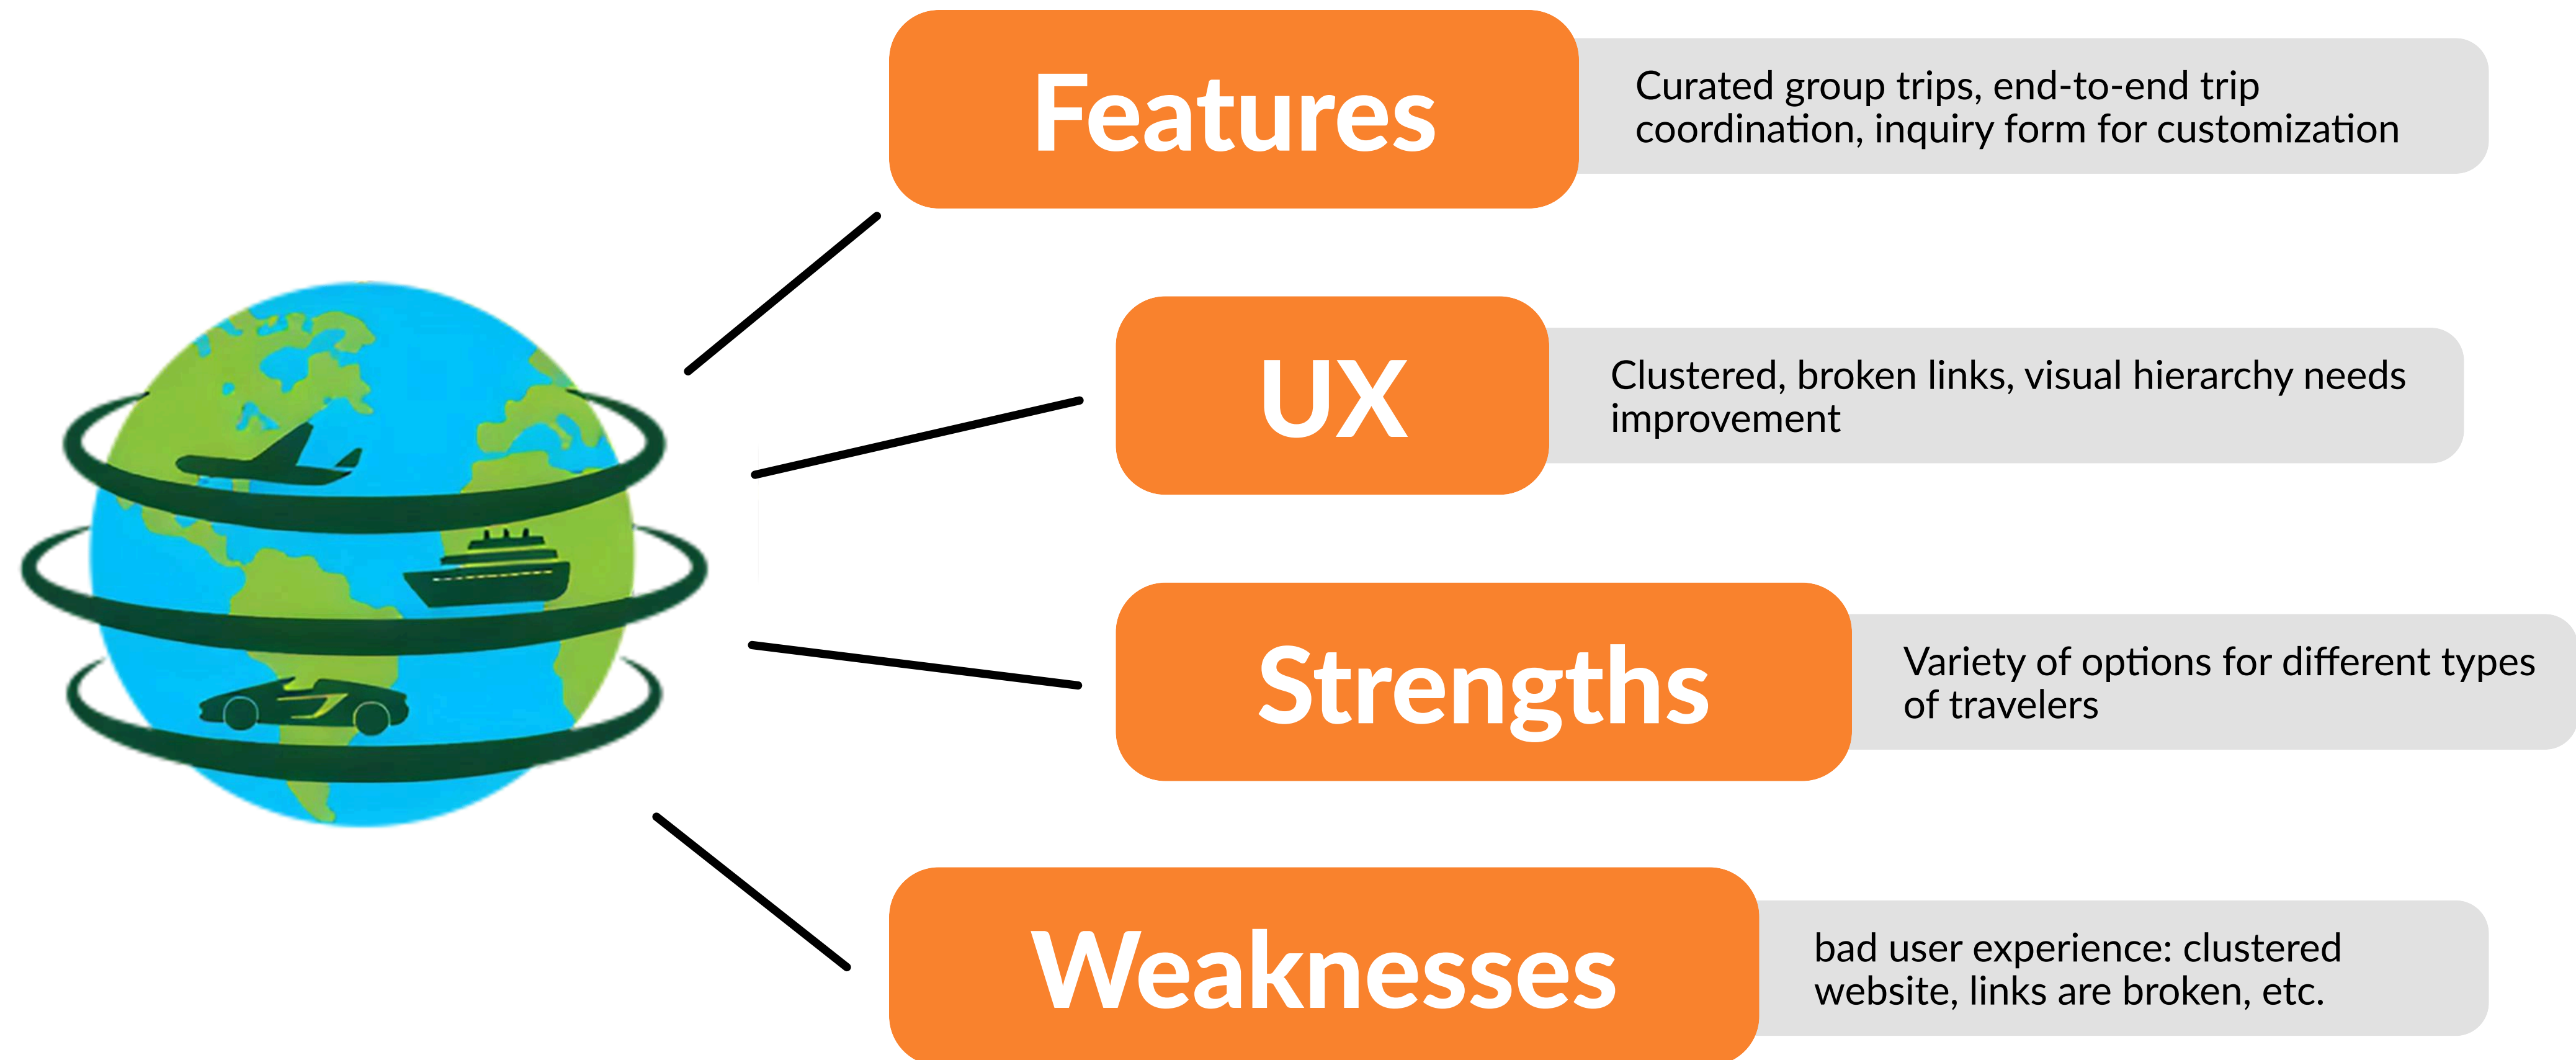

Strengths

- Features (comprehensive guide, interactive map, etc.)
- Colors to separate different aspects
- Provide travelers with many options

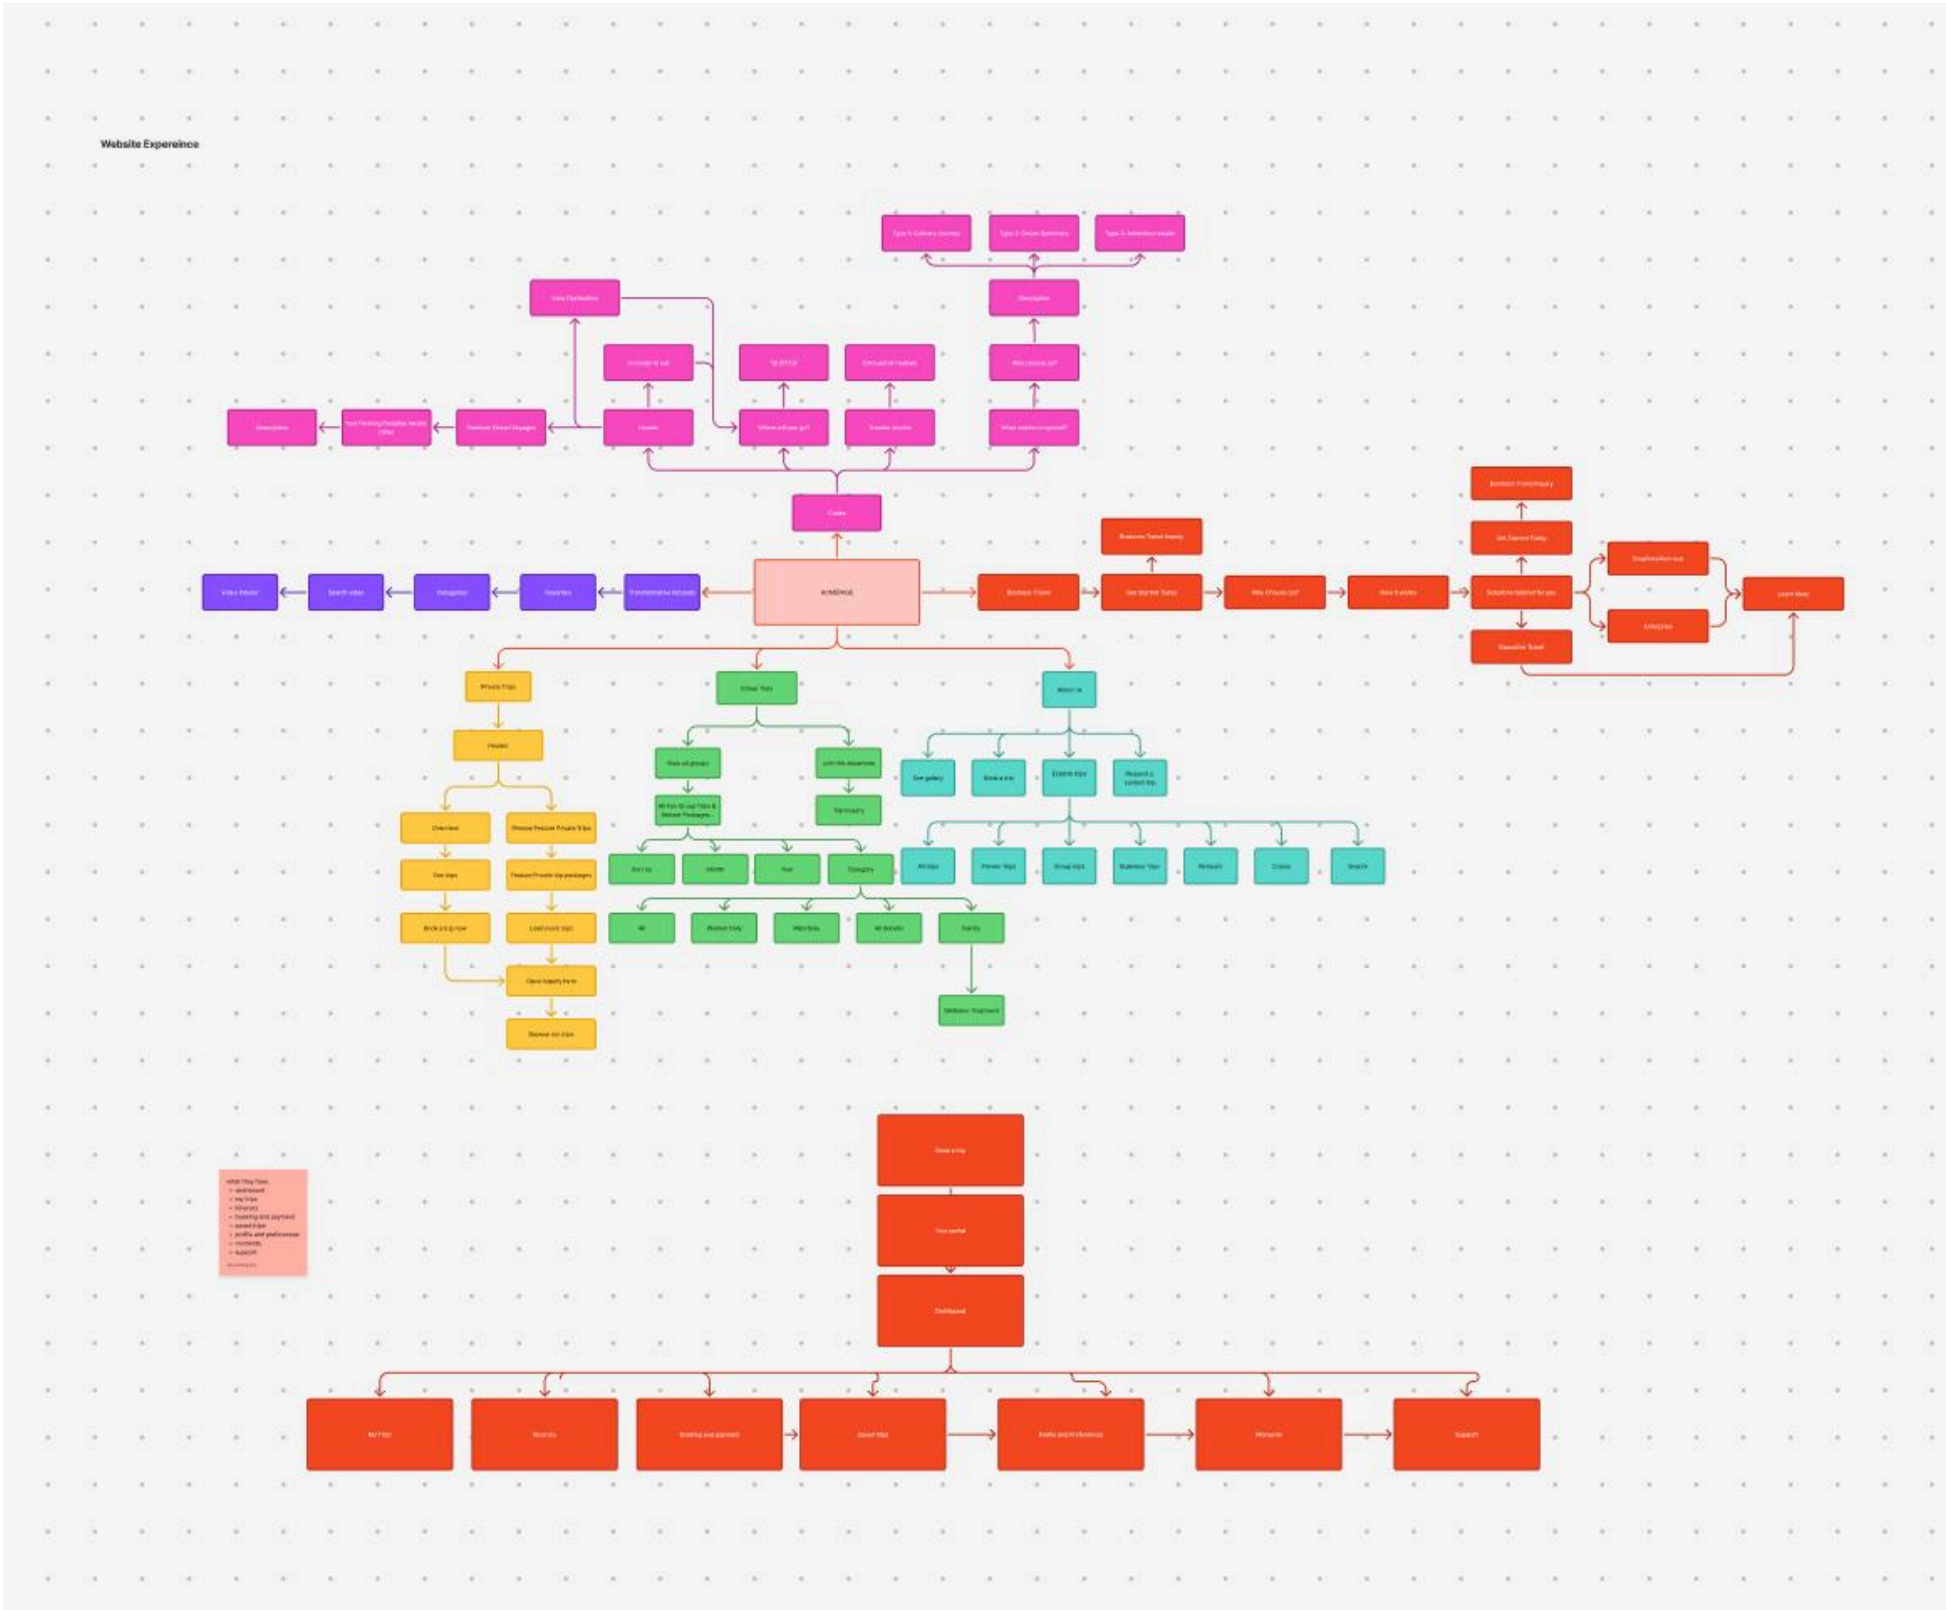

Weaknesses

- Search/filter limitations
- No strong visual hierarchy
- For more niche problems, would need to call in customer support
- Old-looking interface

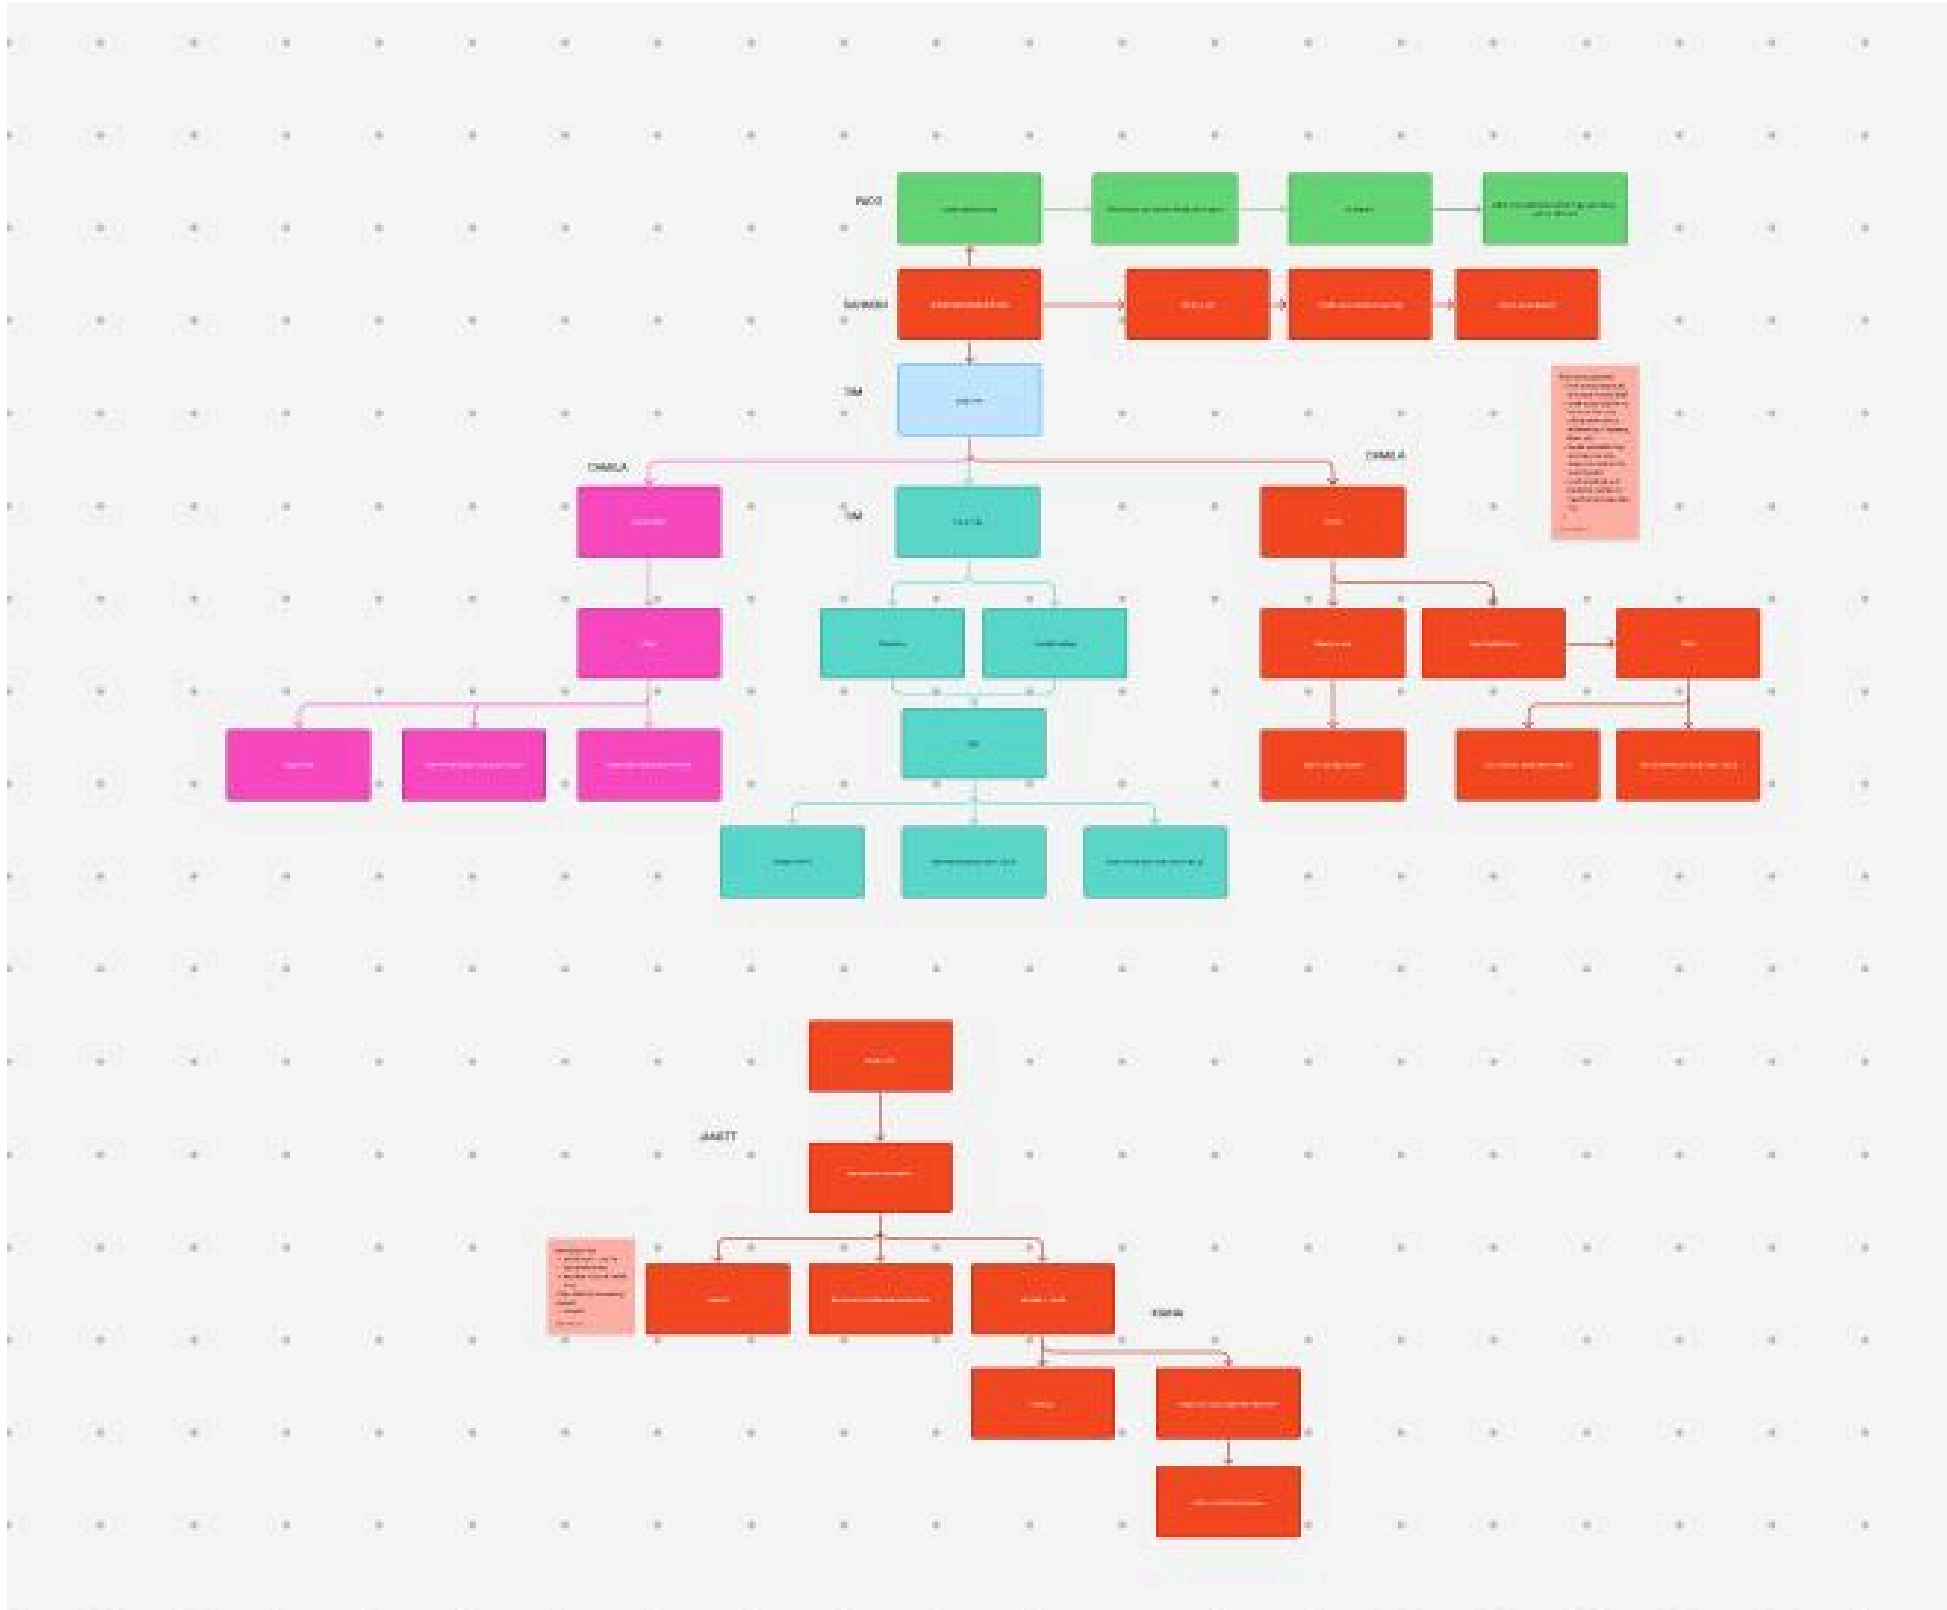

Website Audit

Information Architecture

Website

Mobile App

Key Insights

1

Travelers want intuitive and fast navigation that is easy to access while on the go.

2

Travelers want a clear and organized way to manage their bookings and payments.

3

Travelers want effective filters that help them easily separate and find different types of trips they are looking for.

User Personas

High School Counselor

Age: 38-45

Los Angeles, CA

Alejandra has 2 kids (a six year old and a 12 year old, in addition she brings her husband and grandparents on trips. Her goals out of traveling is to have long lasting memories and a rest period.

Pain Points

- Finding children-friendly activities that also excite the adults
- Hidden costs in booking
- Dealing with an influx of information

Needs from Travel App

- Verification of places being stroller accessible
- A place to manage every activity + have tickets for different activities on hand.

Remote UX Designer

Age: 26-32

New York City, NY

Maya is a remote UX designer living in New York City. She would love to explore new places and travel as a mind-refreshing experience as a break from work.

Pain Points

- Safety concerns; Many activities or reservations are designed for groups rather than solo
- Travel planning can feel overwhelming because information is scattered across many platforms

Needs from Travel App

- Personalized solo-friendly travel itineraries
- Safety insights such as safe neighborhoods, transportation tips, and emergency resources
- Discovery of local events, small group tours, or meetups with other travelers

Remote UX Designer

Age: 26-32

New York City, NY

Pain Points

- Safety concerns; Many activities or reservations are designed for groups rather than solo
- Travel planning can feel overwhelming because information is scattered across many platforms

Needs from Travel App

- Personalized solo-friendly travel itineraries
- Safety insights such as safe neighborhoods, transportation tips, and emergency resources
- Discovery of local events, small group tours, or meetups with other travelers

Software Designer

Age: 27

Santa Cruz, CA

Fiona is a software designer who is interested in yoga, mindfulness, running and traveling. Her goals are to explore new locations while meeting new people and working on her fitness

Pain Points

- Always recommended same locations as others
- Too much effort comparing
- Too much effort to coordinate everything

Needs from Travel App

- Wants a luxurious vacation experience that allows her to get aesthetic photos
- Wants to be able to coordinate with good fitness instructors within her location

University Student

Age: 22-24

Berkeley, CA

Joshua is a university student planning his graduation trip. Him and his friends wants to travel to many places as a final trip as students and make great memories before they graduate together.

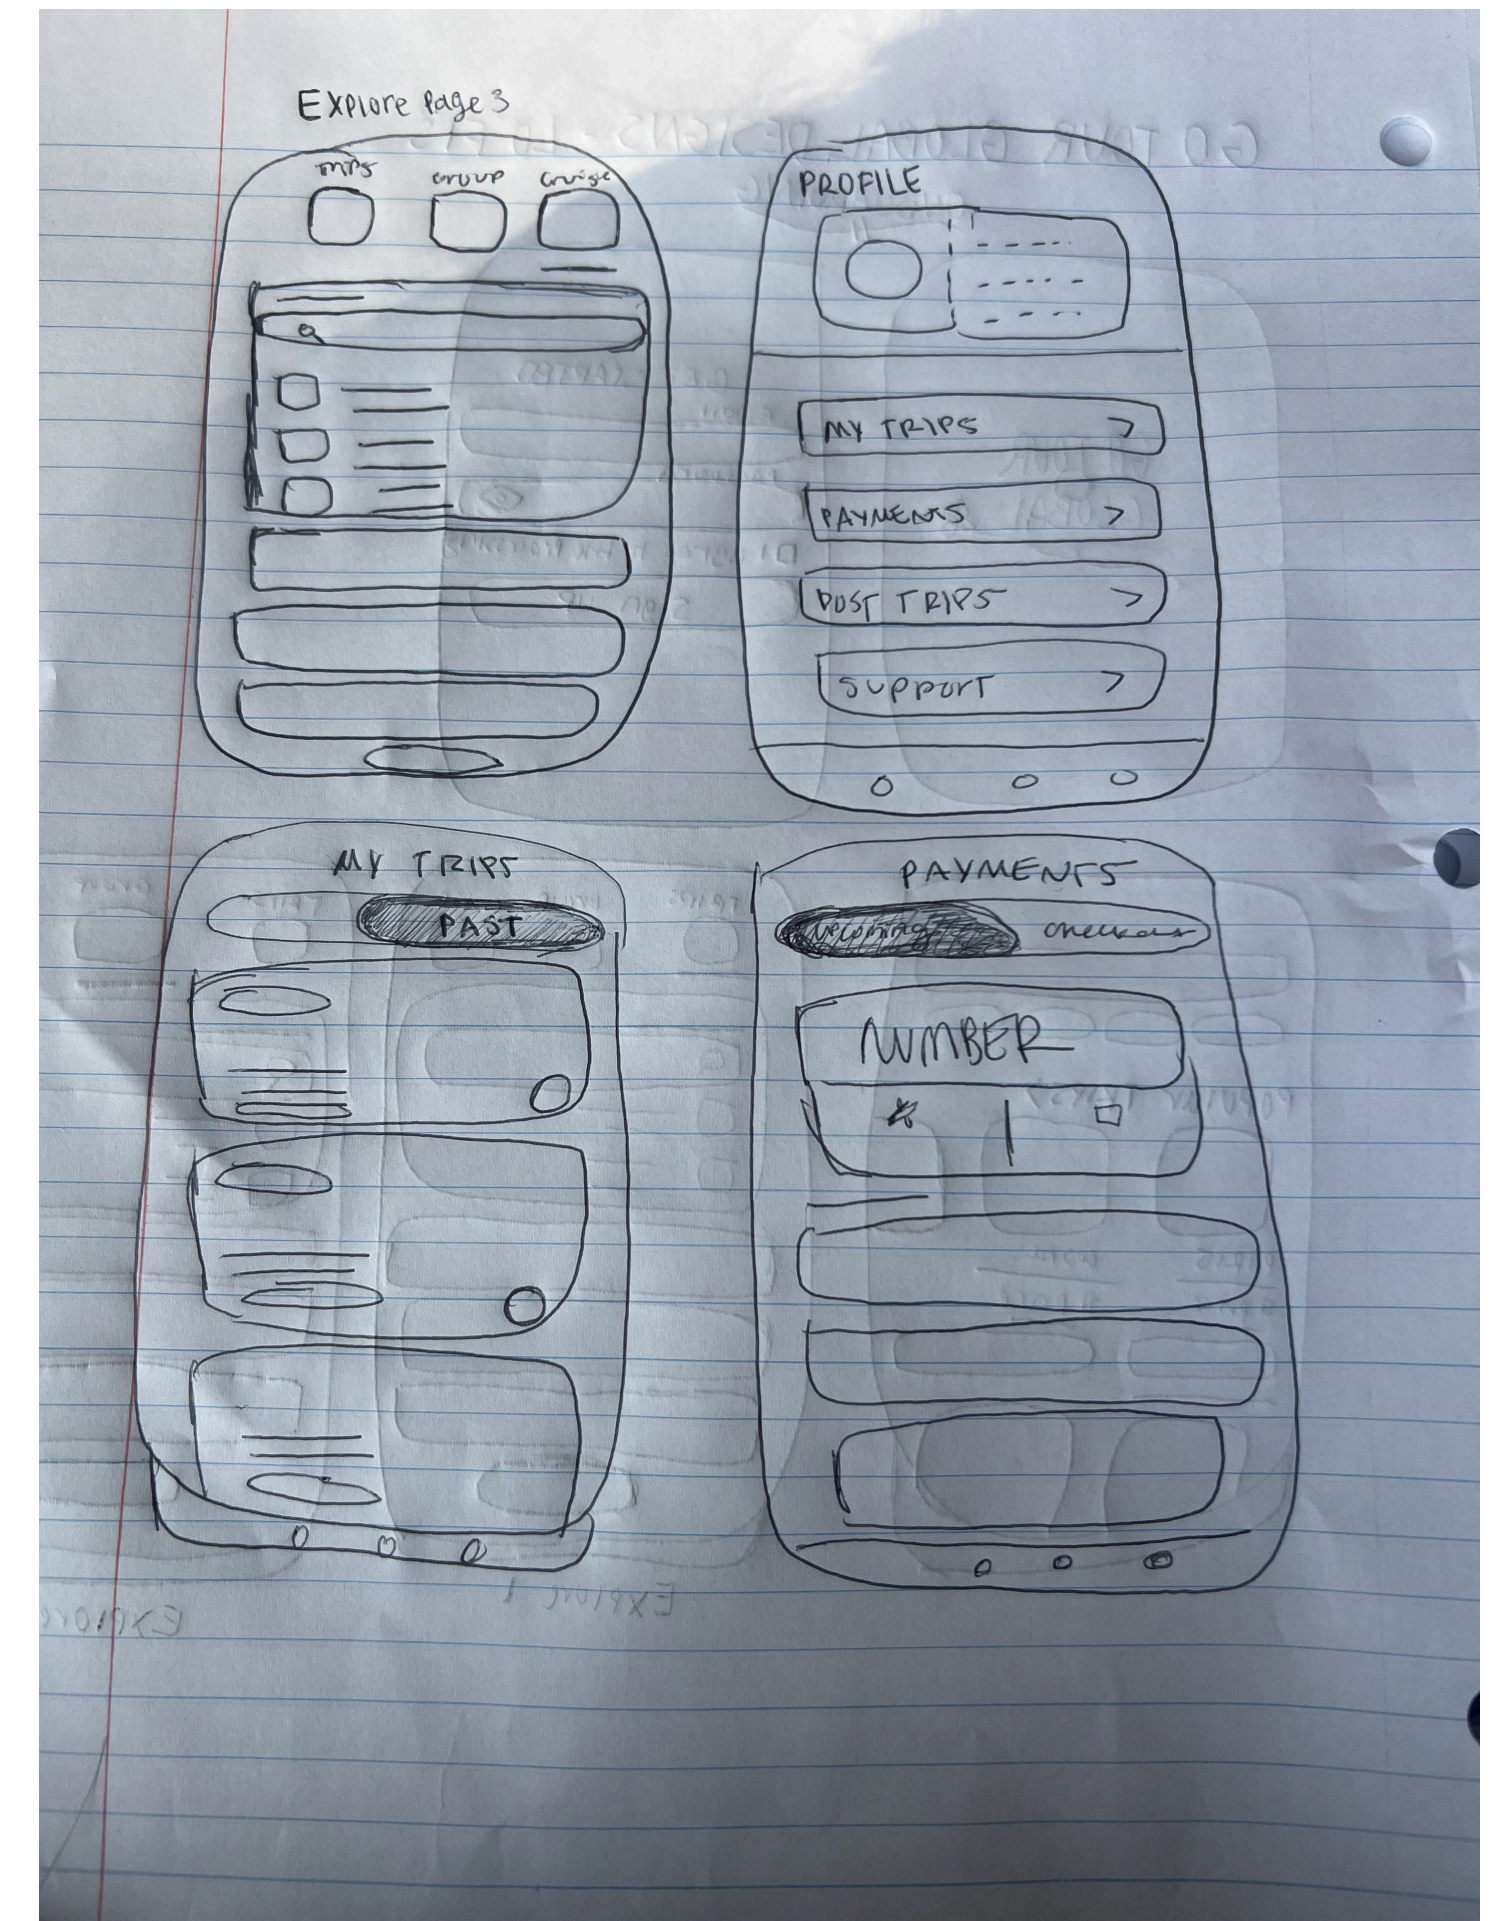

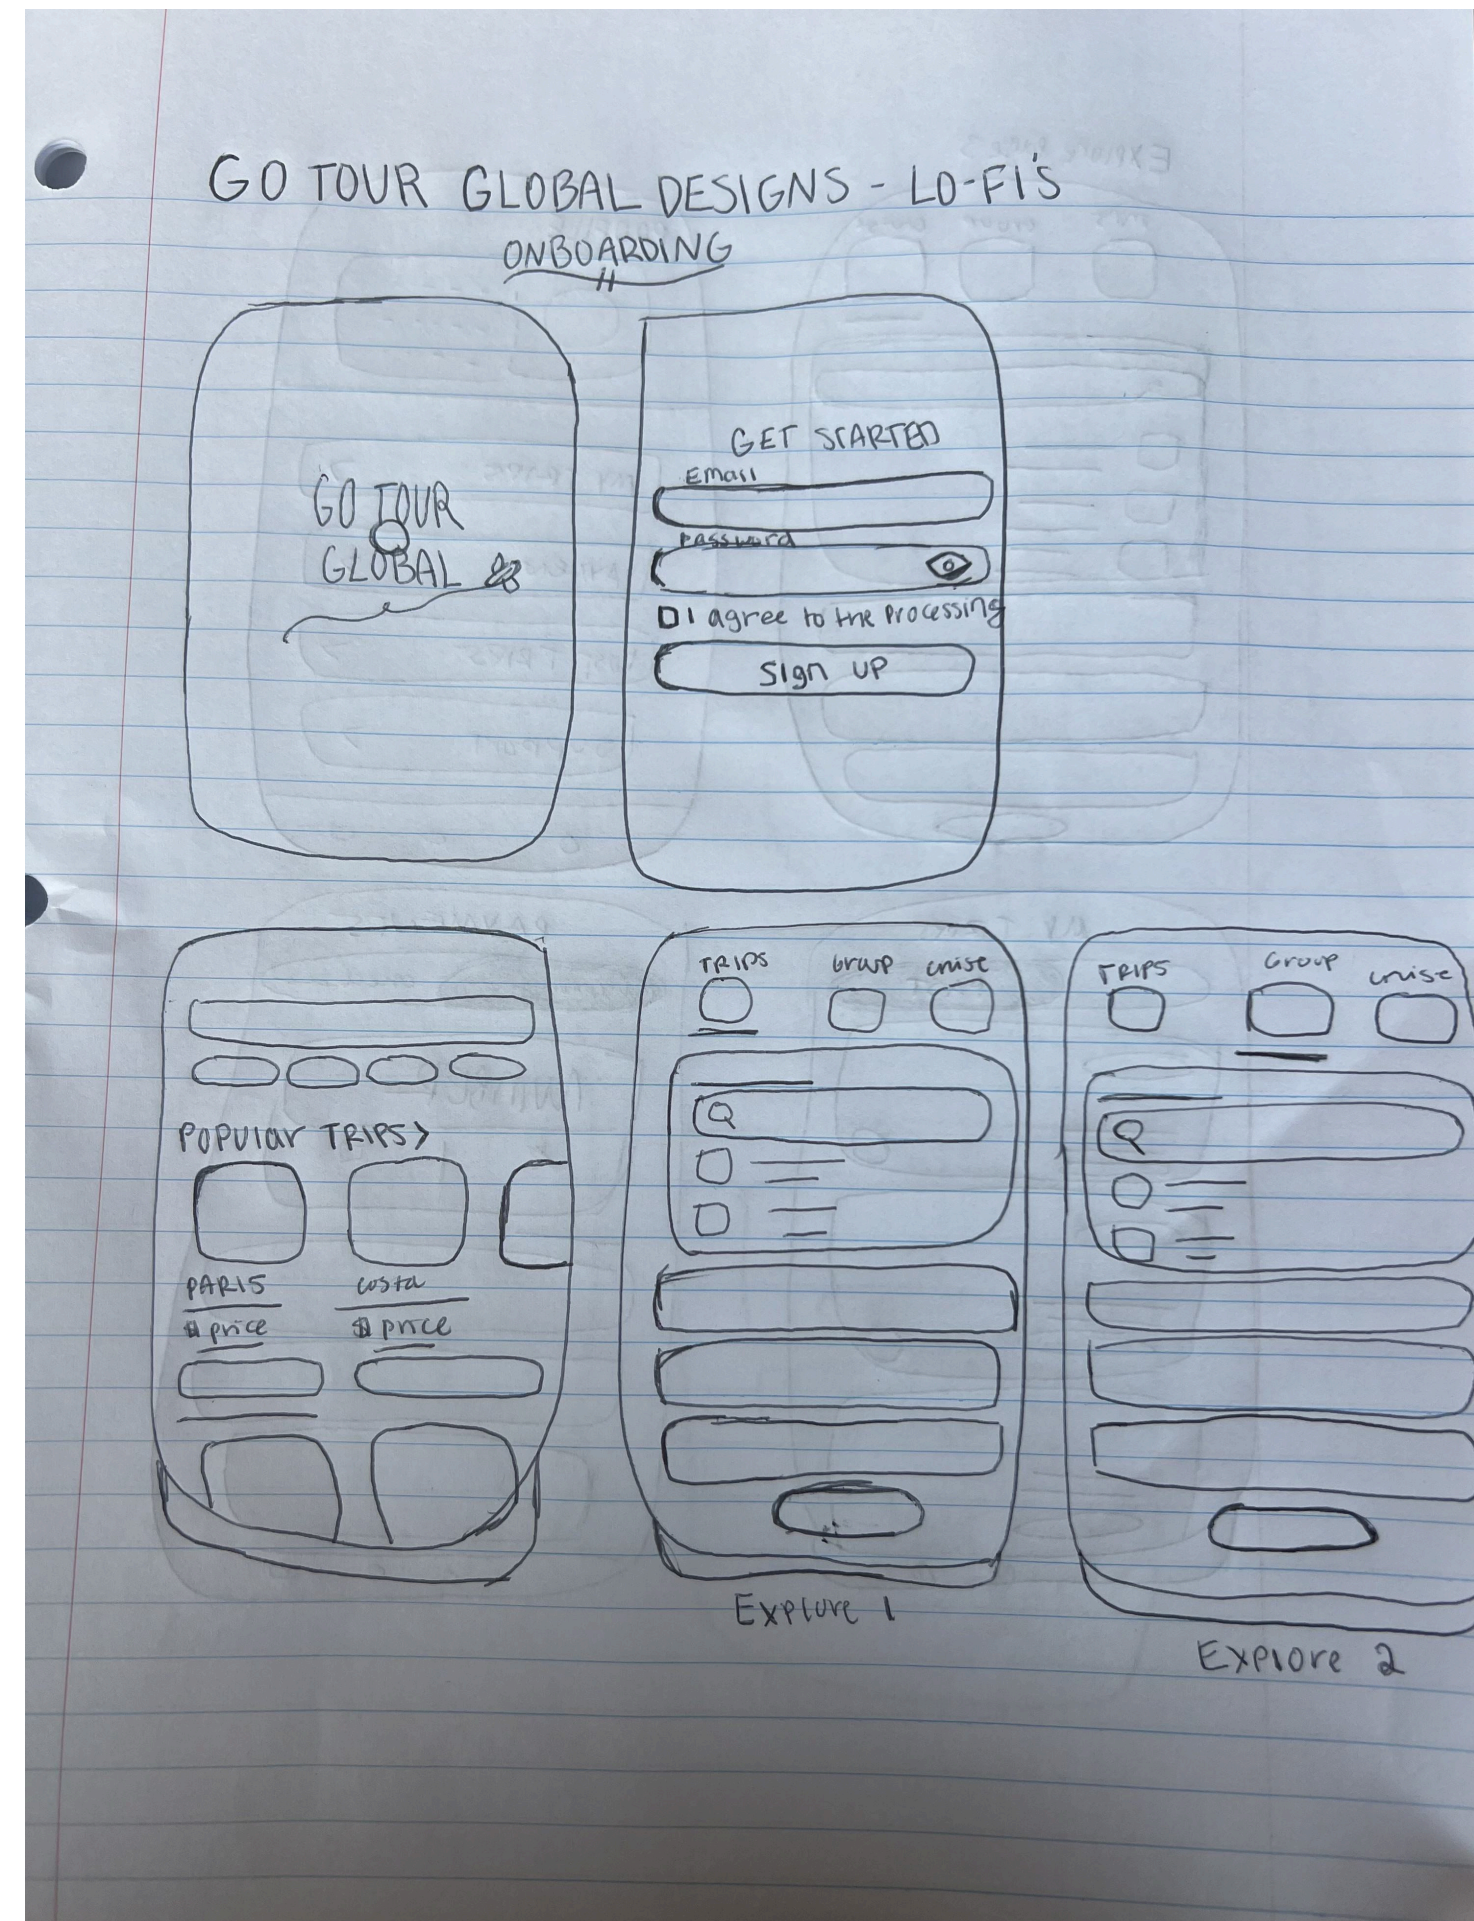

Pain Points

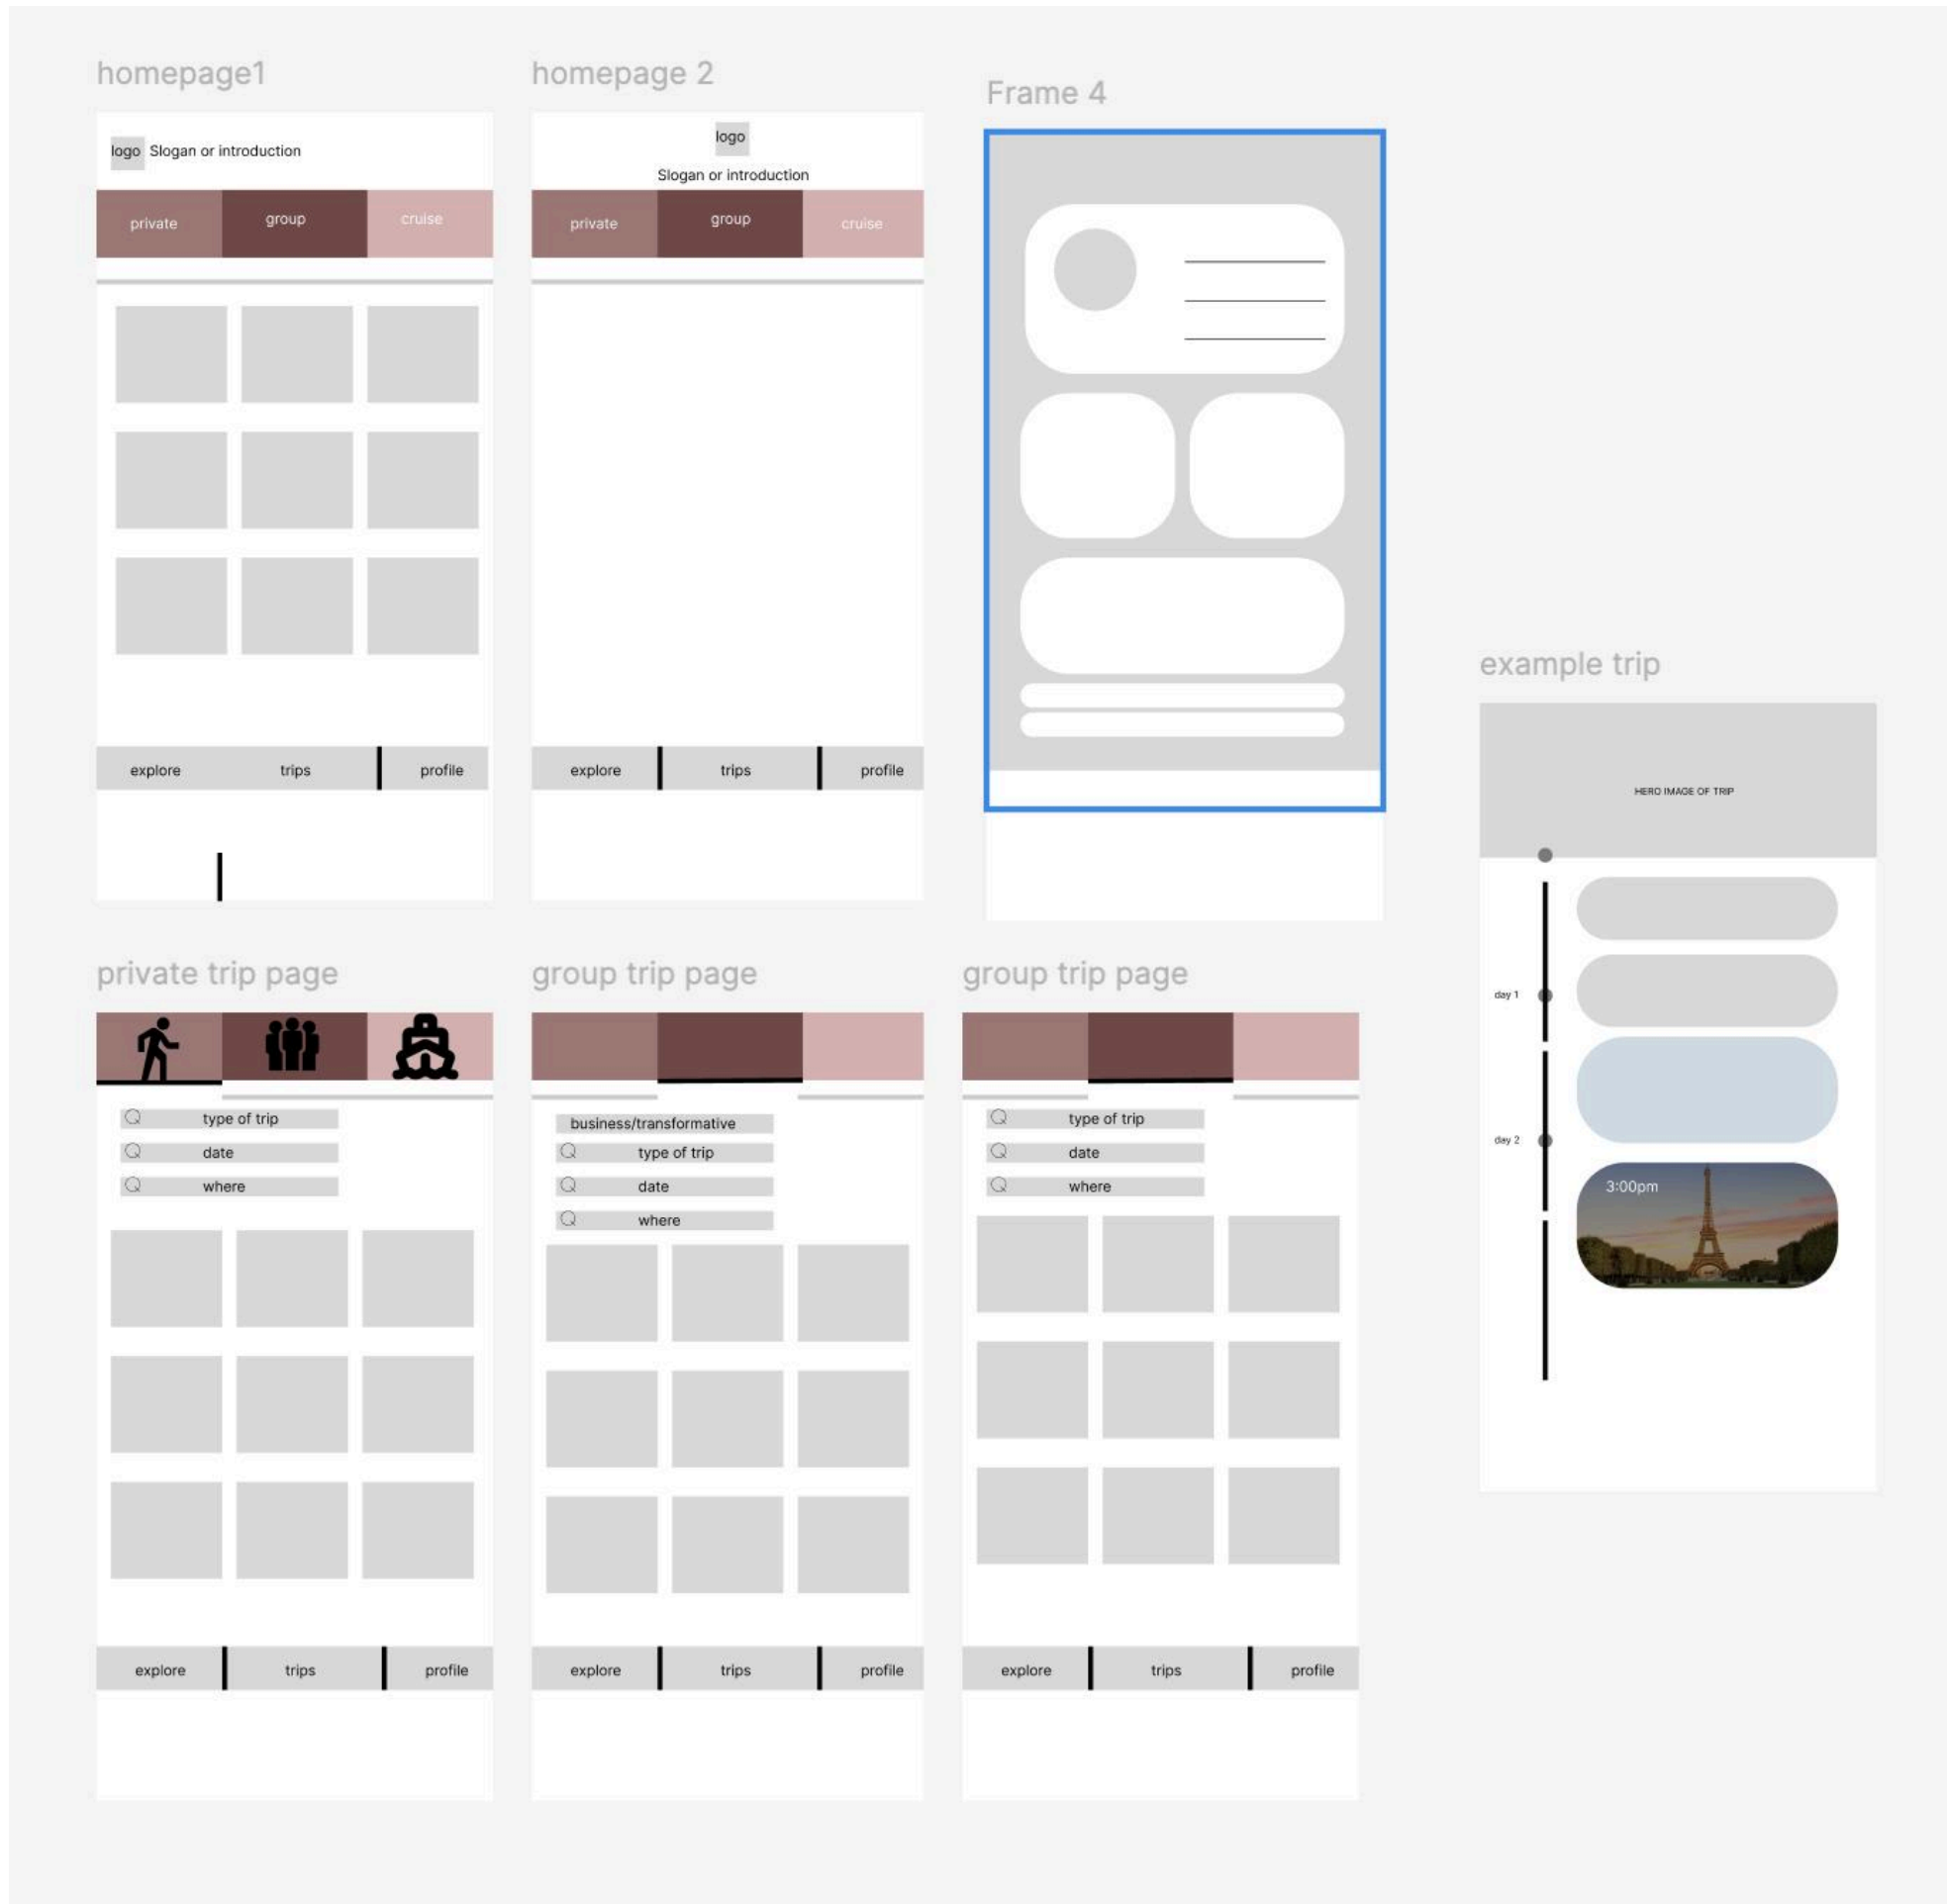

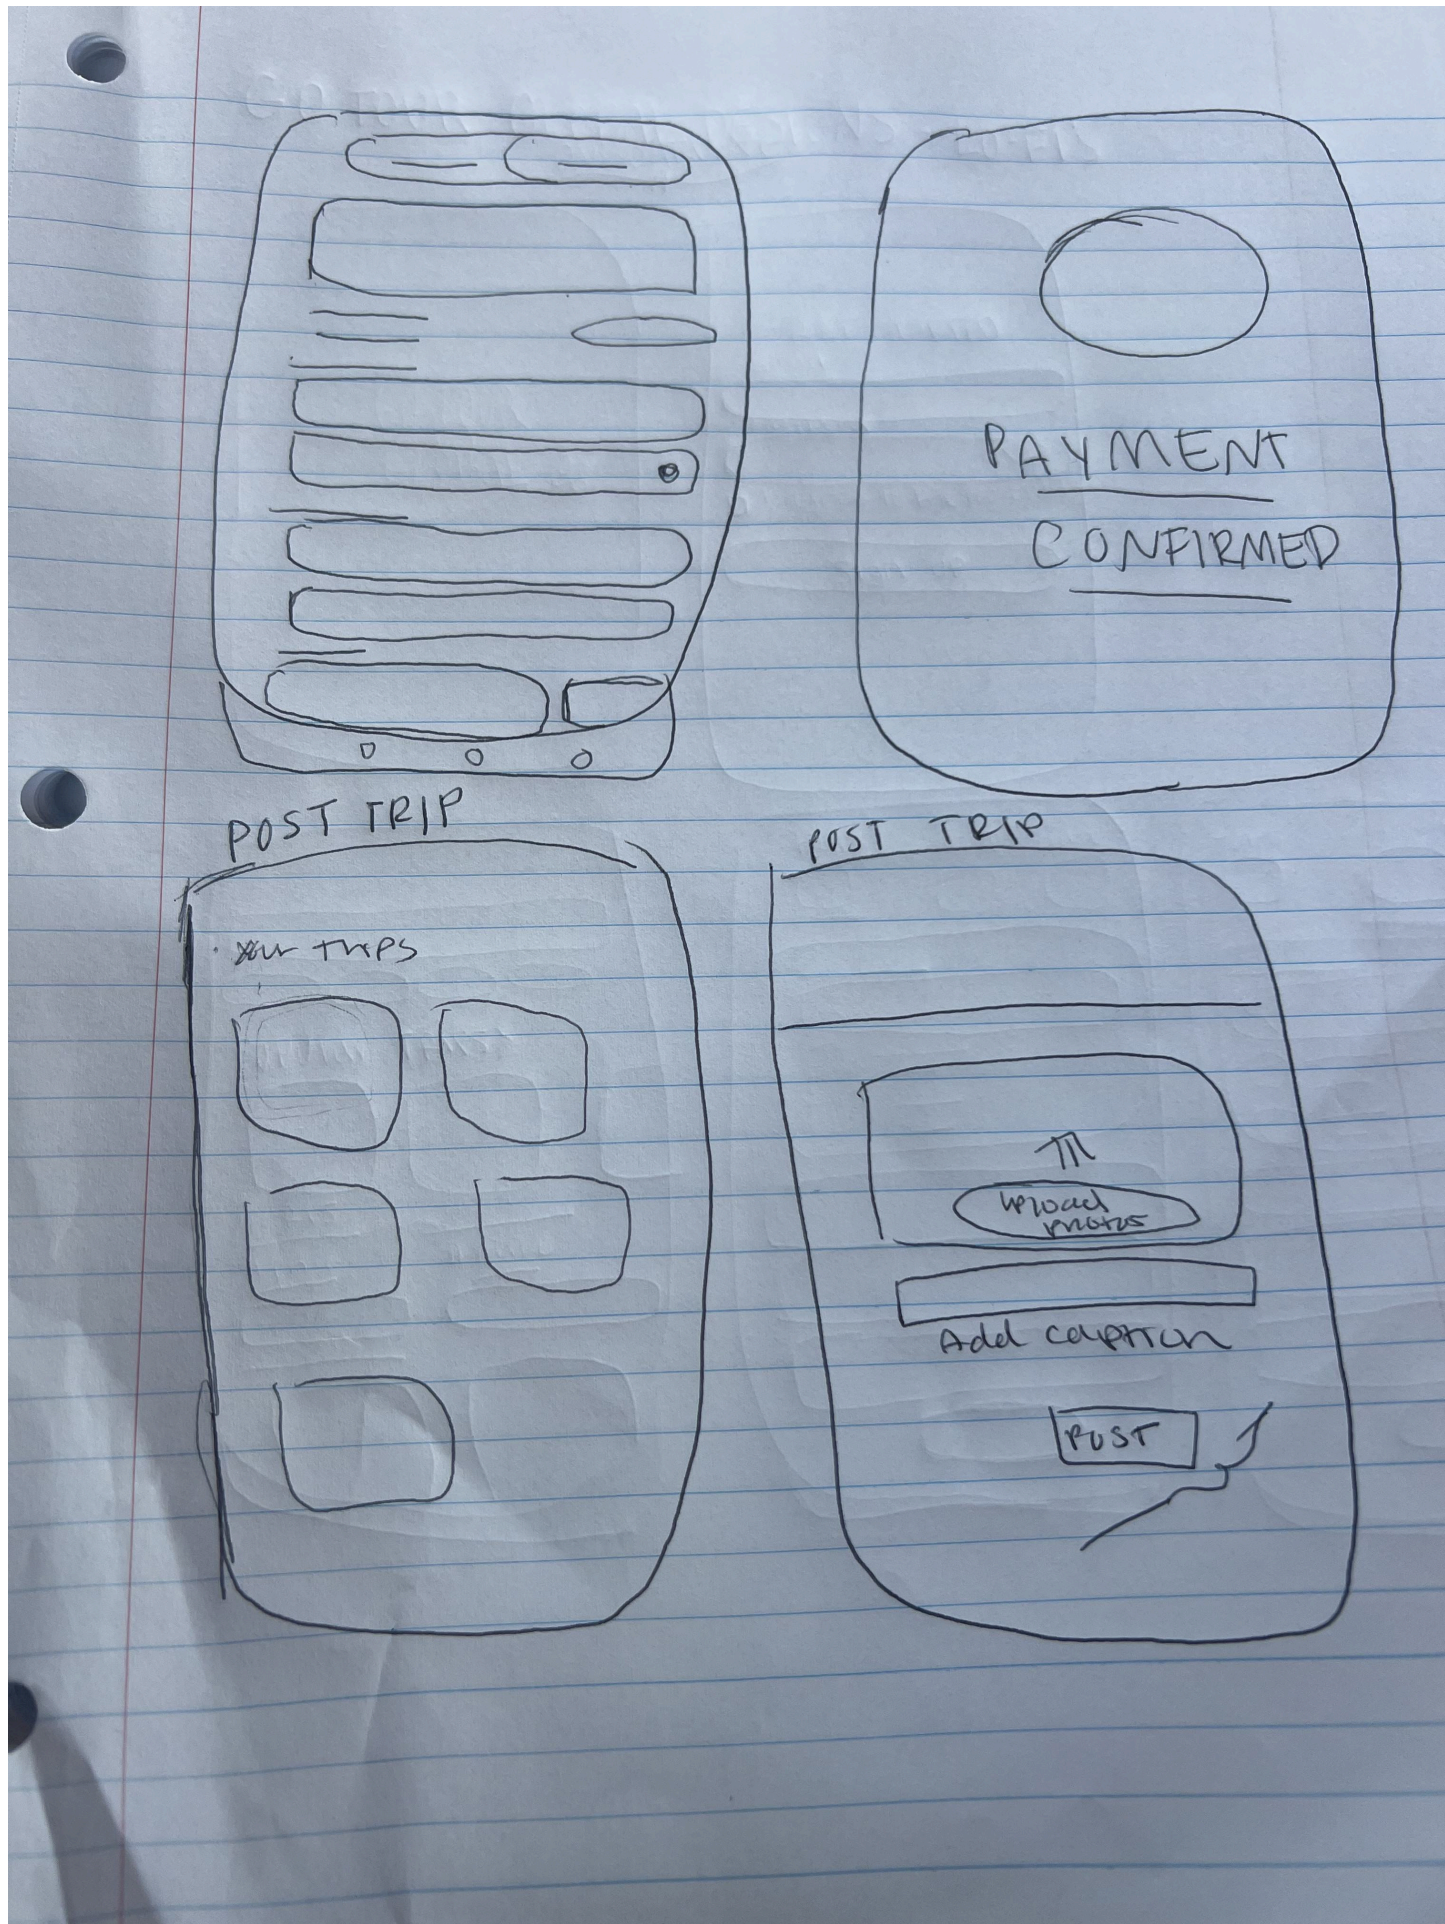

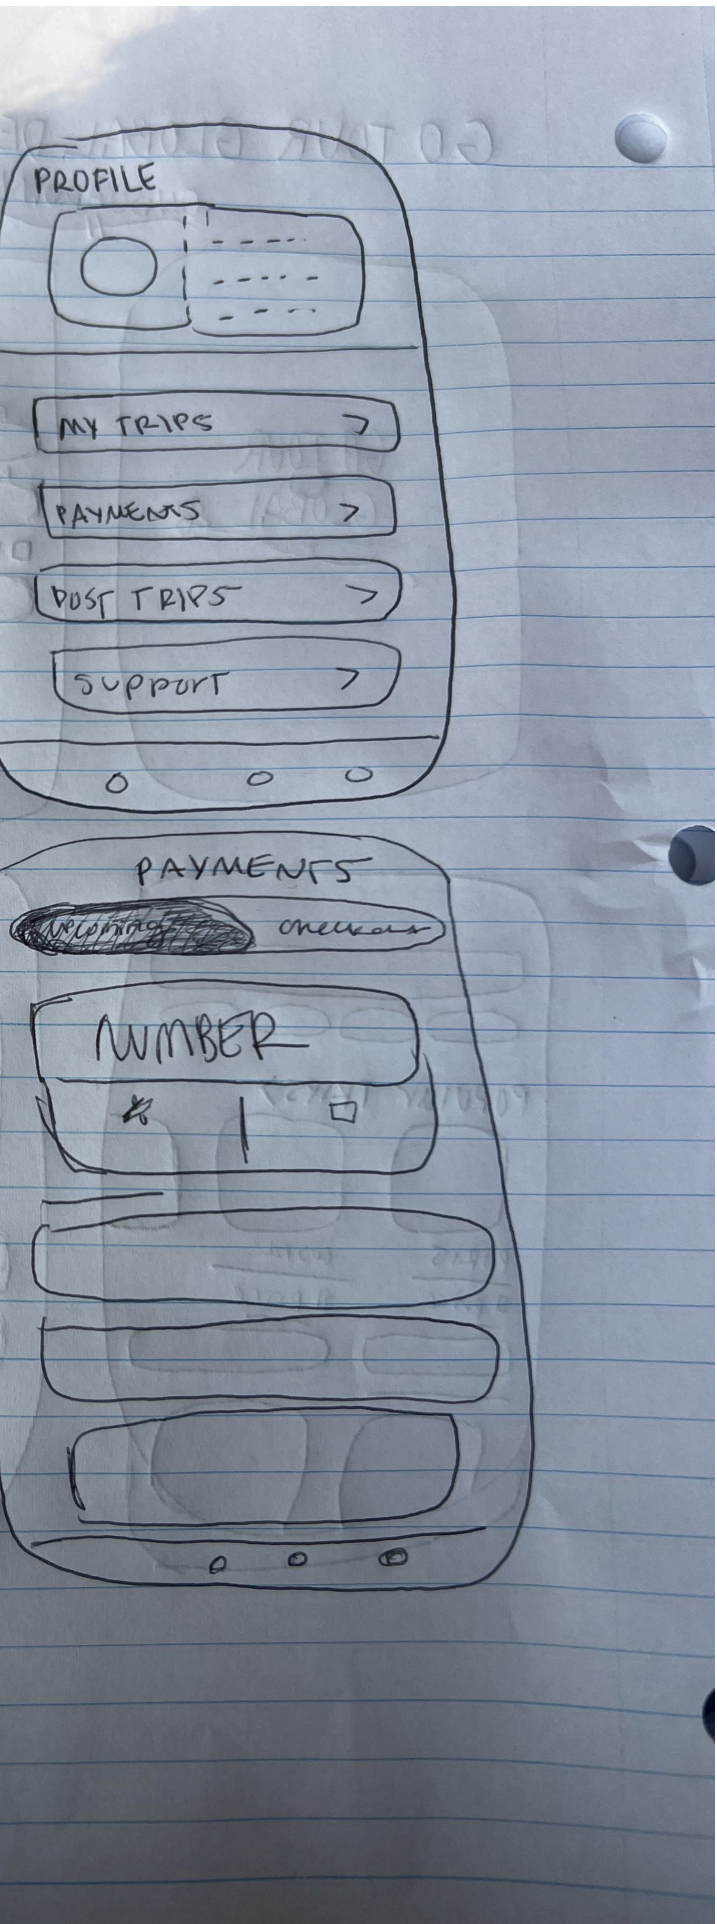

- Aligning schedules with lots of people
- Disagreements on budget and activities
- Hard to track who paid for what and for who

Needs from Travel App

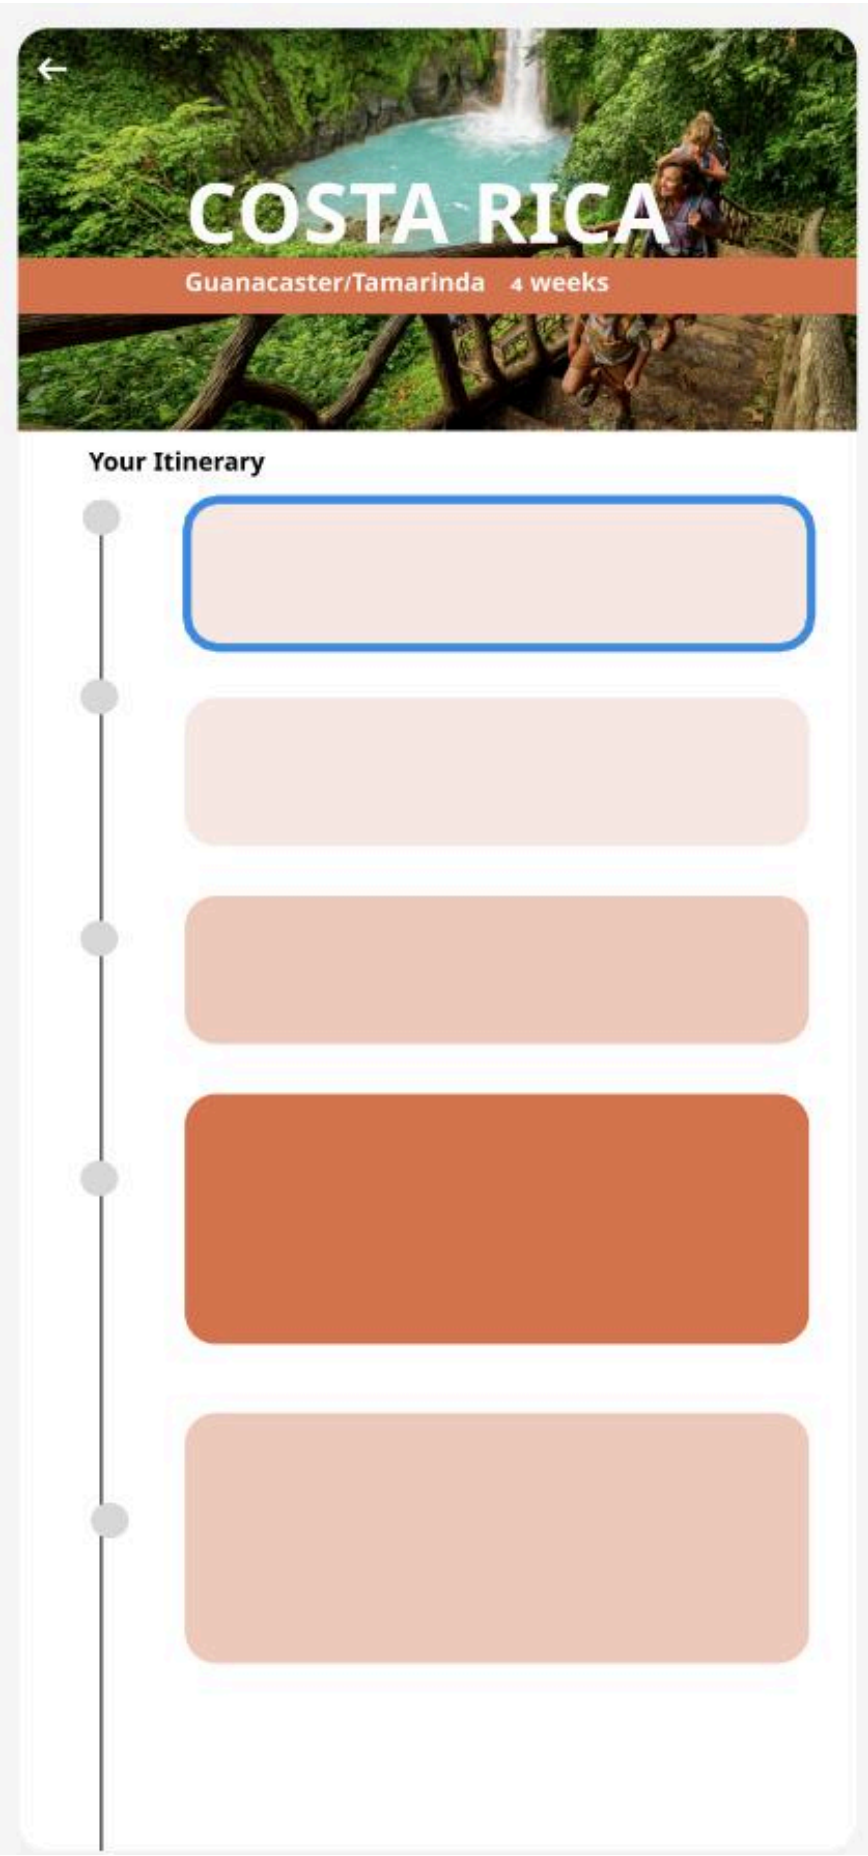

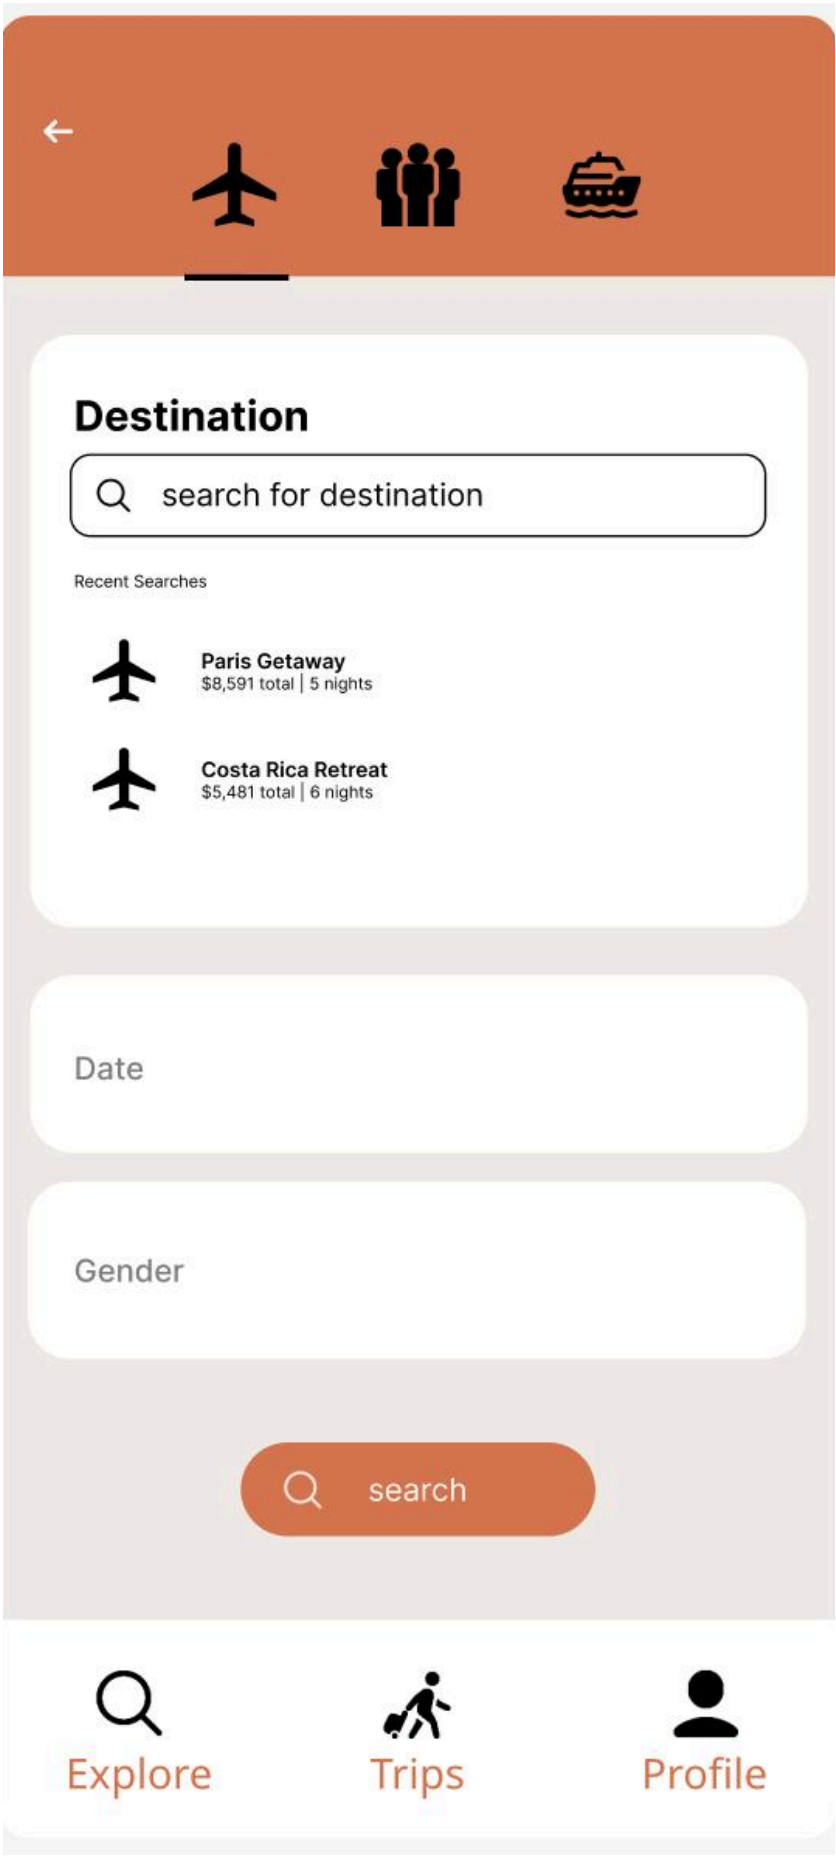

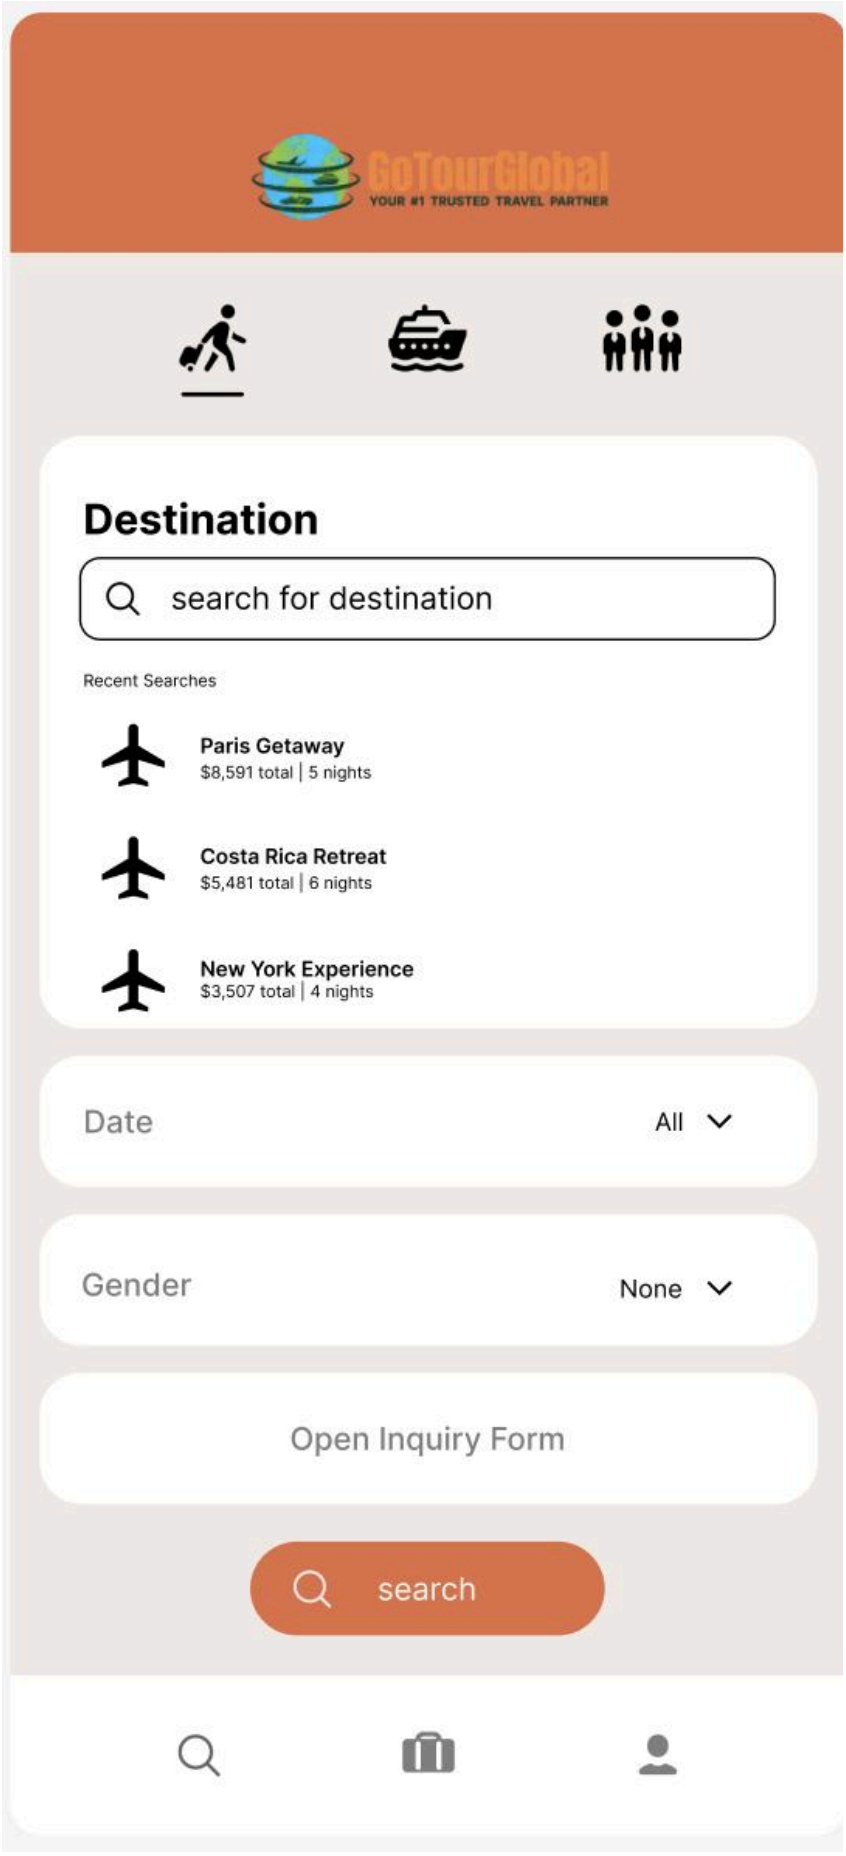

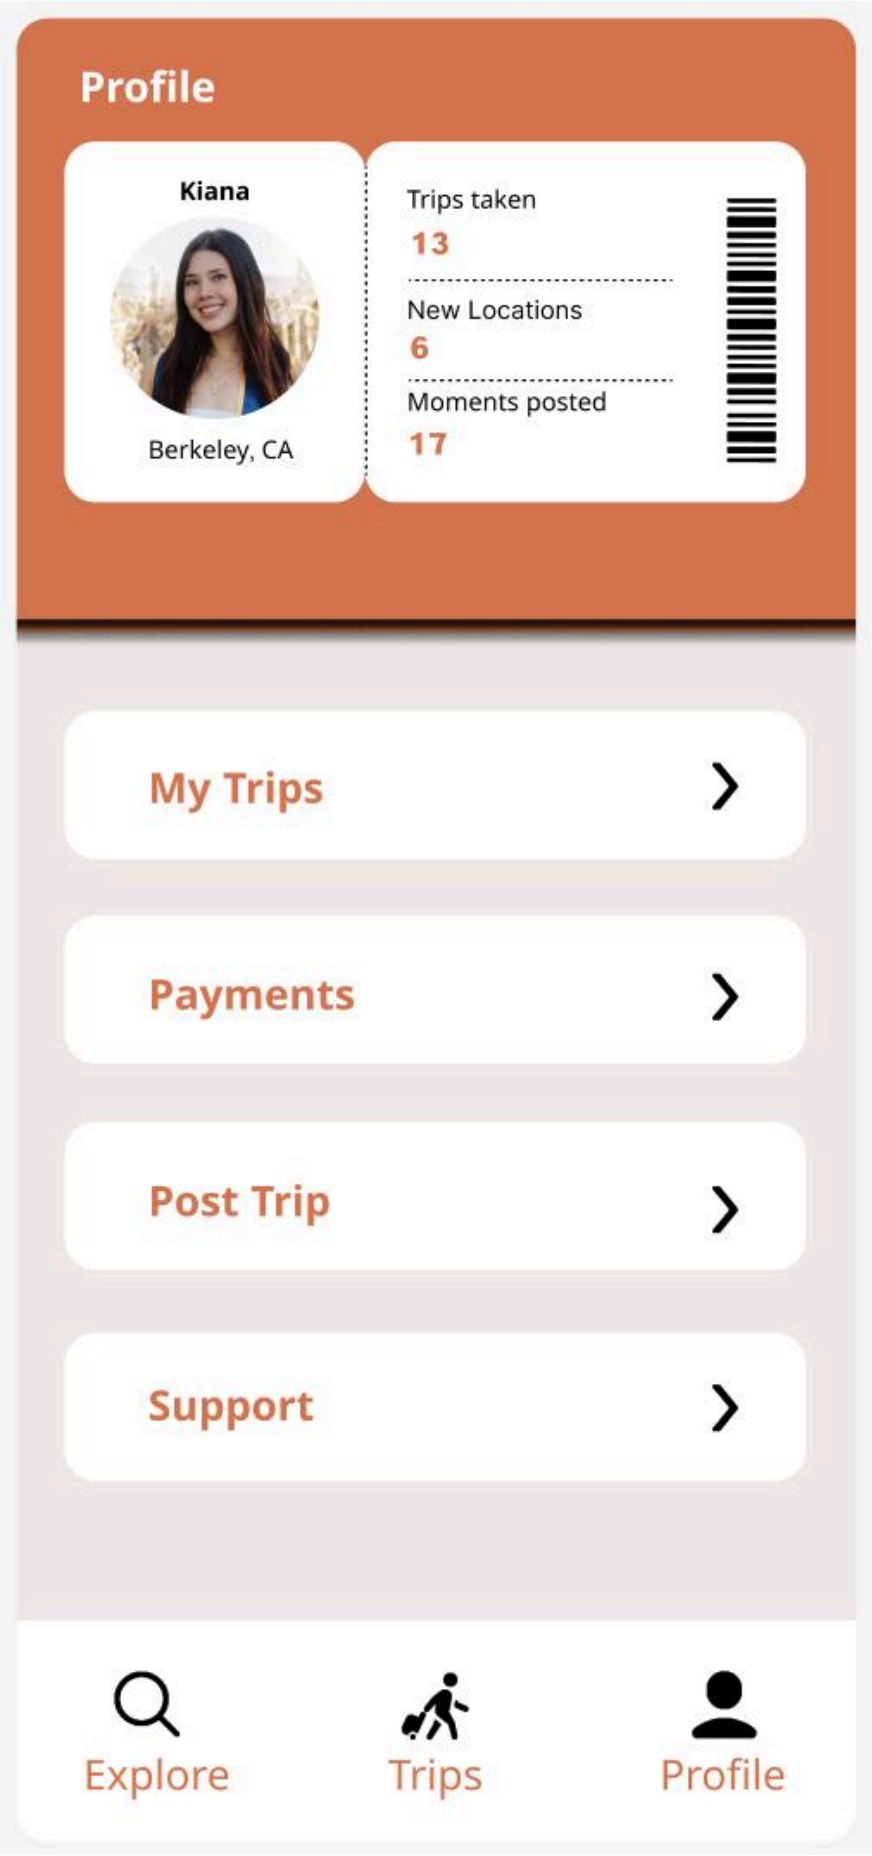

- Shared itinerary chart so everyone can edit and view the plans
- Built in expense splitting and payment tracking
- Voting feature for activities and hotels
